L1-Q3. (E) String Reverse

j

CODE

```
import java.util.*;
public class Main{
    public static void main(String[] args){
        Scanner sc=new Scanner(System.in);
        String s=sc.next();
        for(int i=1;i<=s.length();i--){
            //String rev=s%10;
            //rev=s/10;
            //System.out.println(rev);
        }

    }
}
```

OUTPUT

L1-Q4. (E) Matrix Addition

j

CODE

```
import java.util.*;
public class Main{
    public static void main(String[]args){
        Scanner sc=new Scanner(System.in);

        int rows=nextInt();
        int cols=nextInt();
        System.out.println("Enter no of rows");
        System.out.println("Enter no of cols");
        int[][] matrix1=new int [rows][cols];
        int[][] matrix2=new int [rows][cols];
        int[][] result=new int [rows][cols];
        System.out.println("element in 1st Matrix");
        for(int i=1;i<rows;i++){
            for(int j=1;j<cols;j++){
                matrix1[i][j]=nextInt();
            }
        }
        System.out.println("element in 2nd matrix");
        for(i=1;i<=rows;i++){
            for(j=1;j<=cols;j++){
                matrix2[i][j]=nextInt();
            }
        }
        System.out.println("Addition of the Matrix");
        for(i=1;i<=rows;i++){
            for(j=1;j<=cols;j++){
                result[i][j]=matrix1[i][j]+matrix2[i][j];
            }
        }
        for(i=1;i<=rows;i++){
            for(j=1;j<=cols;j++){
                System.out.println(result[i][j]);
            }
        }
        System.out.println(" ");
    }
}
```

OUTPUT

```
(no output)
```
